Mounika Kattubadi

Software Engineer · Full Stack (MERN)

SUMMARY

Full Stack Software Engineer with hands-on experience building and deploying production-grade web applications for B2B and manufacturing domains. Completed 7+ industrial projects. Strong backend experience in designing REST APIs, authentication systems, invoice generation, email automation, and admin workflows. Comfortable owning features end-to-end from frontend to backend and deployment.

WORK EXPERIENCE

Full Stack Developer · Vikah Ecotech
Sep 2024 – Present · Hyderabad

- Developed and maintained production websites and internal dashboards for recycling and manufacturing businesses.
- Implemented server-side business logic for enquiry handling, admin-managed content, and secure data processing.
- Designed responsive and reusable React components based on Figma designs to ensure consistent UI across pages.
- Integrated frontend with backend services, handling form validations, error states, and structured data flow.
- Deployed applications on Hostinger, managing builds, domains, environment configurations, and DNS settings.
- Collaborated directly with founders to convert business requirements into scalable technical solutions.

KEY PROJECTS

RubberScrapMart
B2B Marketplace · MERN Stack

- Designed and developed a full-fledged B2B marketplace for buying and selling rubber scrap.
- Implemented secure authentication flows including user login, signup, admin login, and forgot password.
- Built RESTful backend APIs using Node.js and Express.js to manage users, products, enquiries, and orders.
- Designed MongoDB schemas and optimized queries for invoices, orders, and user data.
- Implemented invoice generation and automated email notifications.
- Developed admin dashboards for managing listings, enquiries, and user activity.
- Handled complete deployment and production configuration.
- Live Demo

Vikah Ecotech Platform
Recycling Machinery Platform · React-based Web Application

- Developed enquiry management and content-driven pages for recycling machinery and industrial services.
- Integrated frontend with server-side systems for data handling and request processing.
- Converted business workflows into scalable and maintainable UI components.
- Live Demo

Manufacturing Product Platform
Enterprise Web Application

- Designed product taxonomy and navigation structure for industrial buyers.
- Improved maintainability by separating UI, business logic, and backend integration layers.

SKILLS

Programming
Java, JavaScript (ES6+), TypeScript, Python

Frontend (Web)
React.js, Next.js, Vue.js, Vite, HTML5, CSS, TailwindCSS, Bootstrap

Mobile Development
React Native

Backend
Node.js, Express.js, REST APIs

Databases
MongoDB, Mongoose, SQL

Tools & Deployment
Git, GitHub, CI/CD Pipelines, Hostinger, Netlify

HIGHLIGHTS

- Developed secure auth systems with admin & user roles.
- Implemented invoice generation and email automation.
- Owned features end-to-end from backend to deployment.

EDUCATION

B.Tech – Computer Science & Engineering
IIIT RGUKT – RK Valley
2020 – 2024 | CGPA: 8.3

Pre-University Course (PUC) – MPC
IIIT RGUKT – RK Valley
2018 – 2020 | CGPA: 8.66

Secondary School Certificate (SSC)
GVEZP GHS, Dharmavaram
2018 | GPA: 10
